CONTENTS

Volume 20

Number 1, February 1974

M. SATO, S. OKUDA, K. IZAKI, and H. TAKAHASHI: Effect of glycine on phospholipid metabolism in *Bacillus subtilis*. 1
Y. MAEDA, S. NOGUCHI, and S. KOGA: Differential scanning calorimetric study of spontaneous germination of *Bacillus megaterium* spores by water vapor. 11
A. OHTA, K. OKONOGI, I. SHIBUYA, and B. MARUO: Isolation of *Escherichia coli* mutants with temperature-sensitive formation of phosphatidylethanolamine. 21
H. KIMURA and S. MIZUSHIMA: Induction of pectinases in *Acrocylindrium*. 33
K. HOSONO and K. AIDA: Lipid composition of *Saccharomyces cerevisiae* defective in mitochondria due to pantothenic acid deficiency. 47
K. SAKAGUCHI, E. NAKANO, H. SEKINE, and H. TAKAHASHI: Identity of DNA from *Escherichia coli* and from its respiratory-deficient mutant, and the physiological similarity of the latter with lactobacilli. 59

Short Communication

Y. K. PARK and M. TOMA: Some interrelation between microbial xylanase and glucose isomerase production. 67

Number 2, April 1974

A. MURATA: Growth inhibition of *Lactobacillus casei* phage J1 by diethyl pyrocarbonate. 71
Y. YAMAMOTO and A. WATANABE: Fatty acid composition of lichens and their phyco- and mycobionts. 83
H. YAMAGUCHI: Dimorphism in *Candida albicans*. I. Morphology-dependent changes in cellular content of macromolecules and respiratory activity. 87
H. YAMAGUCHI, Y. KANDA, and M. OSUMI: II. Comparison of fine structure of yeastlike and filamentous phase growth. 101
A. M. H. EL-REFAI, L. A. R. SALLAM, and N. NAIM: Transformation of cortisol with representative fungi. 111
L. A. R. SALLAM, A. M. H. EL-REFAI, and N. NAIM: Thin-layer chromatography of some pregnenes and pregnadienes. 117
K. KATO, Y. KURIMURA, N. MAKIGUCHI, and Y. ASAI: Determination of methanol strongly assimilating yeasts. 123

Number 3, June 1974

A. H. EL-REFAI, L. A. R. SALLAM, and I. A. R. EL-KADY: Biochemical aspects of 17α-hydroxylation of progesterone with *Trichothecium roseum*. 129
T. SATO, K. AIDA, and T. UEMURA: An *Escherichic coli* mutant with tryptophanase synthesis specifically insensitive to catabolite repression and the significance of intracellular phosphoenolpyruvate pools. 137

N. B. Chebbi, H. Chander, and B. Ranganathan: Caseinolytic activity of lactic acid bacteria. 149
S. Ogata, K. H. Choi, Y. Ikeda, and M. Hongo: Bacterial lysis of *Clostridium* species. III. Properties of premature lysis provoked by antibiotics in mytomycin C-induced lysis of *Clostridium saccharoperbutylacetonicum*. 153
S. Ogata, A. Umeda, and M. Hongo: IV. Fradiomycin and some other antibiotics are specific inhibitors against endolysin of an inducible bacteriocin. 169

Number 4, August 1974

H. Momose, E. Yamanaka, H. Akiyama, and K. Nosiro: Taxonomic study on hiochi-bacteria, with special reference to deoxyribonucleic acid base composition and chemical composition of bacterial cell wall. 179
B. B. Keele, R. W Wheat, and G H. Elkan: Carbohydrate, nucleic acid, and protein composition of extracellular material from *Rhizobium japonicum*. 187
Y. Uzuka, T. Naganuma, K. Tanaka, and Y. Odagiri: Effect of culture pH on the growth and biotin requirement in a strain of *Lipomyces starkeyi*. 197
A. P. Singh and E. S. Idziak: Role of carbohydrates in the regulation of alkaline phosphatase biosynthesis in wild type and gamma-irradiation resistant mutants of *Escherichia coli*. 207
H. Yamaguchi: Effect of biotin insufficiency on composition and ultrastructure of cell wall of *Candida albicans* in relation to its mycelial morphogenesis. 217
S. Nagai, Y. Nishizawa, and S. Aiba: Some consideration on the rate of induced aldolase synthesis in *Azotobacter vinelandii*. 229

Short Communication
K. Gonda, N. Murase, and S. Koga: Recrystallization models for the thermogram of *Saccharomyces cerevisiae*. 243

Number 5, October 1974

T. Iijima: Mutability of the phleomycin-resistant mutants of *Bacillus subtilis*. II. DNA synthesis and phage growth in a mutable strain. 247
M. Kageyama and A. Inagaki: Genetic mapping of pyocin R3 factor in *Pseudomonas aeruginosa*. 257
M. Kageyama: Genetic mapping of pyocin R1 factor in *Pseudomonas aeruginosa*. 269
Y. Uzuka, T. Naganuma, and K. Tanaka: Influence of culture pH on the initiation of biotin biosynthesis in a strain of *Lipomyces starkeyi*. 277
K. Yamasato, S. Goto, K. Ohwada, D. Okuno, H. Araki, and H. Iizuka: Yeasts from the Pacific Ocean. 289
S. Goto, K. Yamasato, and H. Iizuka: Identification of yeasts isolated from the Pacific Ocean. 309
S. Goto, K. Ohwada, and K. Yamasato: Identification of yeasts isolated from seawater and sediment in Aburatsubo Inlet. 317

Number 6, December 1974

K. Kitamura, T. Kaneko, and Y. Yamamoto: Lysis of viable yeast cells by enzymes of *Arthrobacter luteus*. II. Purification and properties of an enzyme, zymolyase, which lyses viable yeast cells. 323

T. Fujiwara and S. Fukui: Effect of D-alanine and mitomycin-C on cell morphology of *Agrobacterium tumefaciens*. 345
K. Hosono, H. Kuraishi, and K. Aida: Effect of pantothenic acid on the respiratory activty and cytological characteristics of *Saccharomyces cerevisiae*. 351
A. F. Abdel-Fattah and M. A. Badawi: Production, induction, and activity of progesterone hydroxylases by *Aspergillus niger* 12Y. 363
T. Nioh and S. Mizushima: Effect of validamycin on the growth and morphology of *Pellicularia sasakii*. 373

Short Communication
B. D. W. Jarvis: A method of obtaining axenic rumen ciliate protozoa. 385
